Table Games Add-On Games

Grand Roulette

IndoPacific Gaming, working with Focus Gaming, has developed **GRAND ROULETTE**. A very simple, easily understood add-on to the traditional game of Roulette. It can be fitted to existing tables without damage to either table or wheel. Installation time is minimal

as there are no training issues, so you can be up and running in no time. Your dealers will be able to deal the game competently within the hour.

So, what is **GRAND ROULETTE**! Whilst the ball is spinning a Random Number Generator selects a number between 0 and 36 and displays this number on a flat screen display on the table. Once this number has been established the ball travels round the wheel for another 3, or so, spins and if the wheel number is the same as the randomly selected number you have a winning combination which will pay-out at 500-1.

This event is supported with a light and sound show from the display. We believe that a winner at 500-1 is worth advertising! The bets are placed on a normal roulette layout using special **SLAMMER** chips. These chips identify the player as a Grand Roulette player, and as such can win the 500-1 payout. If a **SLAMMER** chip is on the winning wheel number and Grand Roulette does not produce a match the player still wins with a 10-1 payout.

Similarly, if a **SLAMMER** chip is found to be on the number that has been randomly generated, but with no match, the bet is paid at 10-1, so all is not lost. Just two stacks of **SLAMMER** chips in eight different colours are held on the table and it is suggested that a separate value is assigned to the chip other than the table limit; this gives the chip an identity of its own.

GRAND ROULETTE can operate on its own or in conjunction with the **FOCUS** Table Management System. This system automates many of the manual procedures on the table and records all cash and chip transactions throughout a gaming session.

A table camera records the spin and plays this back on the table display, immediately after the system reader has identified the wheel number. Data on dealer performance and win/loss figures can be produced at any time during a session. The benefits of **GRAND ROULETTE** and **FOCUS** working together make a winning combination.
