Currency Handling Solutions

**Coin Change Machines
CM-250 / CM-500 / CM-750**

When you're looking for high performance, excellent security and value for money - the Change Mate range outperforms its competitors.

No other coin change machine offers so many features for so little. The Change Mate range features top quality construction. Sophisticated laser technology is used to create high quality machines to suit almost any application.

Simplicity of use, security and successful operation are assured with a Change Mate. With its larger capacity, easy top loading, user friendly systems and high level of security, the Change Mate range meets industry demands for high quality, cost effective coin change machines.

The Change Mate's genuine full accountancy provides all information quickly and effectively using 15 fixed and 15 resettable meters. Among the accountancy features are total currency in and out, coins and notes listed by denomination and records of coins dispensed.

The hopper empty function is an additional feature which allows users to empty the hopper while simultaneously counting the coins. Used in conjunction with the accountancy function, this ensures accurate, secure operation.

An electronic log retains information regarding the previous 10 transactions, ensuring accurate data is immediately on hand, should it be required.

The Change Mate series features top loading, which allows additional coin capacity as well as ease of loading. With separate levels of access to each area of the machine, the Change Mate's level of security is second to none.

All Change Mate machines are supplied with either a lockable security base or wall mounting bracket as standard, along with a cup holder and 20 cups.

User friendly operation with large LCD featuring user prompts. Genuine full accountancy to ensure accurate data.
