## COIN and NOTE CHANGE MACHINES

QC7500  
QC7750

A revolutionary new product, the Quick change QC-7500 series changes notes to coins, coins to notes, coins to coins and notes to notes. Leading the way in coin and note change machine development, the QC-7500 series combines cutting edge technology, functional good looks and a high level of security.

Created with the latest technology, the Quick Change range of coin and note change machines has become the standard within the industry.

Designed to make the business of coin and note changing simple, secure and successful, the QC-7500 series features casino level security as well as full accountancy and reporting, ensuring absolute integrity.

Only the highest quality componentry is used in the manufacture of the QC-7500. Laser technology ensures cabinet finish and quality is excellent, while its security features are second to none.

State of the art electronics put the QC-7500 at the forefront of the industry, while its design is flexible enough to accommodate alternative brands of coin and note validators if required.

### **Features:**

- Large memory capacity, allowing for an event log which records all data for up to 3000 events. This can be reviewed via the large LCD or optional printer. All events are recorded, including door operations, notebox removal, refills, power function, currency acceptance (by denomination) and coins dispensed.
- Top door allows for convenient loading, with an adjacent keypad which allows the operator to record refills accurately. This user-friendly keypad is also used for pin-number security, printing reports, and adjusting date and time functions.
- Two additional serial ports, allowing monitoring, EFT-POS or other connections.
- Cup tray featuring optical sensors to avoid coin spillage, cup holder and cups are supplied as standard with each QC-7500.
- User-friendly operation with large LCD featuring user prompts.
- Genuine full accountancy to ensure accurate data.
- The QC-7500 features 48 metres - 24 fixed and 24 resettable - which can be viewed with the doors closed for maximum security.
- Hopper empty function, which allows operators to empty the hopper and count the coins simultaneously.
- Other brands of coin and note validators can be accommodated.
