## Shufflers

### Continuous Random Ejection Shuffler

VendingData™ Corporation has developed the Continuous Random Ejection Shuffler utilizing the same technology as the Random Ejection Shuffler™. With this machine, all playing cards remain in a continuous shuffle, except for a small batch used during play. After play, this batch is returned to the shuffler, and a new batch is used for play. The Continuous Random Ejection Shuffler provides operator security by neutralizing card counters and locaters, while increasing player satisfaction derived from a hand-held game. The cards may also be loaded and dealt from a traditional shoe.

#### FEATURES

- Utilizes random card selection process
- Shuffles from 1 to 8 decks
- Easy flip-of-a-switch programming
- Offers 3 versions
- 8 decks / approximately 100 cards
- 6 decks / approximately 50 cards
- Hand held
- Operators can choose hand-held or traditional shoe option
- Accommodates paper and plastic cards
- Lightweight, compact design
- Features universal electrical power
- Batch system capability, utilizing two separate groups of cards

#### BENEFITS

- Random ejection platform ensures unpredictable, untrackable shuffle
- Reduces playing card usage
- Offers continuous play
- Increased security and integrity
- Greater productivity
- Enhanced dealer convenience/comfort
- Customized training

#### RENTAL / PURCHASE

Available for purchase and also on rental plans

#### SERVICE PLAN

Service contracts and service plans are available for both rented and purchased equipment. Extended parts warranty available for purchased equipment.
