Shufflers

The CVI Universal Shuffler

The CVI Universal Shuffler can deal Pai Gow Poker, Caribbean Stud Poker, Wild Hold 'Em Fold 'Em Stud Poker, Three Card Poker, Blackjack and other single and multiple deck games.

The CVI Universal Shuffler features the random ejection platform, which combines computer technology with mechanical engineering to randomly eject all playing cards and restack them in a completely unpredictable manner.

Any card in any position can be ejected at any time when used on single, multiple deck and specialty games. Currently, the CVI Universal Shuffler is the only shuffler in the world that produces a truly unpredictable shuffle. As a result, efforts by expert players to track the shuffle or use other methods to gain a significant advantage are eliminated.

ONE MODEL ACCOMMODATES SINGLE, MULTIPLE DECK & SPECIALTY GAMES

To accommodate the card shuffling needs of today's gaming venues, the CVI Universal Shuffler offers single and multiple deck capabilities. For poker and specialty games like Caribbean Stud, the Specialty Game application offers a revolutionary new shuffling and hand preparation concept. Utilizing the random ejection platform, cards are ejected to form individual poker hands, eliminating the traditional shuffling and dealing process while ensuring a truly random shuffle in a single deck application. The Specialty Game shuffler also verifies the individual hand count and that of the entire deck.

INTRODUCING THE REMOTE KEYPAD

Change from Caribbean Stud Poker to Pai Gow Poker with the touch of a button! Each shuffler automatically defaults to one game. To change the application, simply push the Service button until the proper game appears on the LCD. Touch the GO button to select the game and again to begin dealing the hand. The VERIFY button allows dealers and managers to regularly conduct check and balance systems, verifying the number of cards played and the cards remaining in the deck. Dealers must complete a game before

switching to a new application.

The CVI Universal Shuffler can deal Pai Gow Poker, Caribbean Stud Poker, Wild Hold 'Em Fold 'Em Stud Poker, Three Card Poker, Blackjack and other single and multiple deck games.

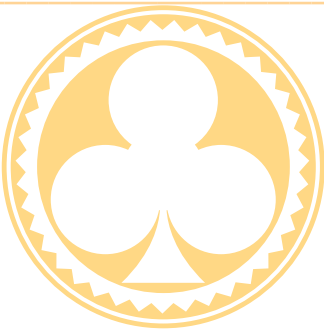

IMPROVING PRODUCTIVITY - EXAMPLE

Assuming the average dealer takes approximately two minutes to shuffle six decks and deals approximately five shoes per hour, the following holds true: 2 minutes times 5 shoes per hour = 10 minutes of down time spent shuffling per hour, per table. Based on a 24-hour game, a dealer spends 240 minutes shuffling or has 240 minutes of down time. Using the CVI Universal Shuffler an additional 4 hours of playing time per table, per day, or an additional 20 shoes per table, per day.

FEATURES

- Random ejection platform ensures unpredictable, untrackable shuffle
- Batch shuffle system enables the dealer to deal one set of cards while the cvi universal shuffler randomly restacks the other set
- Provides and verifies accurate counts for hands dealt, card deck and rounds played for all specially games
- Utilizes the one-pass approach shuffles from 1 to 8 decks
- Accommodates paper and plastic cards
- Provides shuffle diagnostics capability
- Features universal electrical power capability

BENEFITS

- **Increased Security and Integrity:** The CVI Universal Shuffler is currently the only automatic shuffler in the world that has been designed to eliminate shuffle tracking. Card clumps, slugs and sequences are broken up and eliminated through the technology of random card selection. Every shuffler undergoes our Robotics Quality Assurance Process, which includes the use of optical tachometers, laser heat sensors and state-of-the-art optical comparators. The process significantly decreases shuffler malfunctions.

Shufflers

The CVI Universal Shuffler

- **Shuffler Speed:** The ability to use two separate sets of cards and the unique "one-pass" approach yields a much faster shuffle. Used in a six-deck application, the shuffle is completed in approximately 3 minutes. This feature provides the flexibility to neutralize card counters by decreasing penetration without losing valuable hands per hour.
- **Greater Productivity:** By eliminating the down time due to shuffling, a significant increase in hands played per hour can be realized. This increase goes straight to the bottom line.
- **Enhanced Dealer Convenience:** The tabletop keypad display explains any shuffling problems, expediting any dealer or floor supervisor intervention.
- **Lightweight, Compact Design:** The design also includes a swivel stand for easy loading/unloading of cards.
- **Three Applications:** The CVI Universal Shuffler accommodates 1-6, 8-deck & specialty game applications.
- **Interchangeable Application:** No additional programming required.
- **Customized Training:** Casinovations provides both operational training for dealers and pit personnel, as well as technical training for those operations not located in Casinovations' service areas.
